## Career Vision:

Enthusiastic to do work in a team as a team member and as well as individual worker in a challenging environment and interact with people to contribute in an organization where I can integrate my knowledge and skills to add value to that organization and explore my potentials.

A career which most merely a means of living but a means for making life meaningful and satisfying by providing medical consultation to people during their need and as a researcher specially in the public health sector.

To confront challenges in the global health scenario and develop strategies to overcome them through an organized community effort using communication skills, energy, technical knowledge and my strong work ethic.
